SITE PROGRESS

THE PROBLEM

# Why Builder Projects Lose Money

Every builder faces the same problems. Most accept them as normal. They are not.

COST LEAKAGE

01

Budget Overruns Found After Handover

Budgets are prepared once and never updated. By the time the overrun surfaces, the project is already done. There is nothing left to fix — only money already lost.

TOWER A — COST TRACKER

Excel · Apr

|            |      |         |
|------------|------|---------|
| Civil Work | ₹80L | ₹1.04Cr |
| Finishing  | ₹42L | ₹61L    |
| Labour     | ₹36L | ₹44L    |
| Overrun    |      | ₹47L    |

OPERATIONS

Client Calling for Updates Every Day

Property buyers and investors have zero visibility into what is happening on site. Every update requires a call, a photo search, and a manual summary — pulling the PM away from actual work.

02

COST LEAKAGE

03

Subcontractor Billing Exceeds Actual Work

Subcontractors bill for more work than was executed. Without quantities linked to bills, overbilling passes undetected. Disputes happen after payment — when money is already spent.

|                     |  |                 |
|---------------------|--|-----------------|
| BILL — RAMESH CIVIL |  | No verification |
| Claimed: 4,200 sqft |  | Unverified      |
| Actual on site      |  | Unknown         |
| Approved & paid     |  | ₹2.94L          |
| Overbilled estimate |  | 1,060 sqft      |

|                                 |  |               |
|---------------------------------|--|---------------|
| SITE REGISTER — TOWER B, DAY 18 |  | Manual        |
| Rajesh Kumar — Mason            |  | Off-site      |
| Suresh Helper                   |  | Not verified  |
| Ahmed Painter                   |  | Marked absent |
| Payroll auto-calculated         |  | Wrong data    |

OPERATIONS

Labour Attendance Unverified Across Towers

Supervisors mark registers manually. Workers who were never on site get counted. Payroll disputes follow every month — but by then the wages are already out the door.

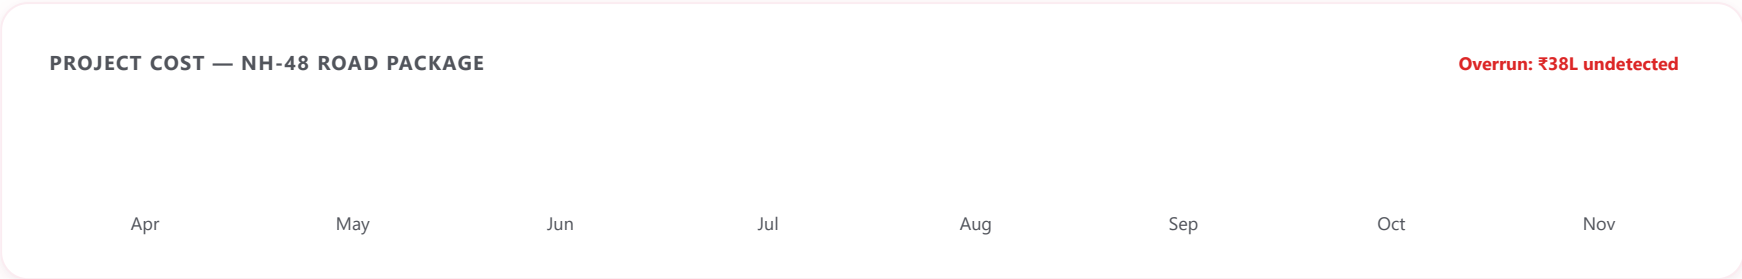

04

VISIBILITY

# No Live P&L View Across Phases and Towers

Project cost is visible only after every bill is in — usually after handover. A ₹38L overrun that built up over six months shows up as one number at the end, with no point where action was possible.

05

HOW ONSITE SOLVES IT

# One Platform. Every Problem Fixed.

Budget, progress, subcontractors, labour, and finance — connected in one system so nothing slips through.

Live P&L Across Every Phase and Tower

Every expense flows into a live P&L the moment it is recorded. See profit and loss per tower, per phase, and across the full project in real time — no month-end wait, no handover surprises.

PLATFORM FEATURES

Everything Builders Need. One Platform.

The four modules below cover where builder projects lose money — budgets, client visibility, subcontractor billing, and unverified labour costs.

 PROJECT EXECUTION

# Deliver Projects On Time and Within Budget

Time and cost control are critical for builders and developers. Onsite’s project scheduling, Gantt charts, and cost-tracking tools enable you to set deadlines, monitor progress, and avoid budget overruns. Automate task allocation, track dependencies, and get alerts for potential delays — ensuring timely project delivery without sacrificing quality.

 CLIENT TRANSPARENCY

# Enhance Client Communication and Transparency

Keep property buyers, investors, and stakeholders informed on every stage of the construction process without the need for constant follow-ups. With Onsite’s ERP software for builders and developers, real-time updates, progress photos, and milestone tracking are instantly visible to all authorized users.

- Real-time updates shared automatically
- Progress photos with geo-tag and timestamp
- Milestone tracking visible to all stakeholders

Labour Tracking 4.9

Subcon Control 4.8

Rated by builders across India and the Middle East

We were looking for construction management software that could help us share clear project updates with clients. With Onsite, all the progress and cost details are visible in one place. Client discussions became much smoother because we were talking with actual site data instead of estimates.

Client Updates   Budget Visibility   Progress Tracking

Mr. Hiren Patel

DCC, Mumbai · Civil Construction

We stopped discovering overruns after handover

We needed software to track construction expenses and control project costs. Onsite helped us monitor spending at activity level instead of discovering overruns later. As a construction ERP, it brought financial visibility much closer to daily execution on site.

Cost Control   Activity Tracking   Budget vs Actual

Mr. Mohammad Taqi

Hydro Master, Qatar · Building Construction

Reports that actually match what happened on site

Earlier, sharing reports with clients and vendors required manual effort every time. With Onsite, we generate and share structured PDF reports directly from project data. It works reliably without any confusion between site numbers and office numbers.

PDF Reports   Site to Office   Client Sharing

Mr. Anvesh

Bhavya Developers, Andhra Pradesh · Building

Decisions based on real execution, not reconciled spreadsheets

We were searching for construction software where reports actually match site activity. Since using Onsite, project data and cost records remain consistent. Report analysis is clearer, and decisions are based on real execution instead of reconciled spreadsheets.

Data Accuracy   Project Reporting   Cost Records

FAQ

Questions Builders Ask Before Starting

Does Onsite work for multi-tower and multi-phase projects?

How does Onsite prevent subcontractor overbilling?

Can property buyers and investors see project progress?

Does Onsite integrate with Tally and Zoho Books?

How long does it take to go live on Onsite?

Does Onsite work on mobile at the construction site?

Can I track project P&L in real time across all towers?

What is the pricing for builders and developers?

No credit card required · Go live in under 3 days · Dedicated onboarding manager

Onsite is a construction management software built to help construction companies run projects with clarity and control. As a complete construction ERP software, it connects site teams, project managers, procurement, and finance on one platform. By replacing scattered tools and manual tracking, Onsite construction software helps businesses save time, reduce cost leakages, and improve execution across every project. The result is a practical ERP software that supports real site operations, not just reports.
