WHAT CLIENTS SAY

Teams that compared and chose Onsite

“

★★★★★

We evaluated three platforms before choosing Onsite. The others required months of setup and a partner to implement. Onsite had us live in under a week — with our actual BOQ data, not a demo. That alone made the decision obvious.

Faster Setup

project-based pricing built for India

★★★★★

We were using a global platform that charged per user and needed an implementation partner. Switching to Onsite cut our software costs significantly and our team was productive from day one.

★★★★★

After GPS attendance went live our payroll disputes stopped entirely. The site data goes straight into payroll — nothing manual in between.

Payroll Accuracy

MM

M. Munif Al Otaibi

M. Munif Al Otaibi Contracting, Saudi Arabia

We looked at several software options for our Saudi Arabia projects. Most were built for Western markets and did not understand how we track labour, subcontractors, or run billing here. Onsite understood the Gulf market from day one and the team helped us go live within the week.

★★★★★

REAL SWITCHERS

Teams that to Onsite

Not generic testimonials — each team moved away from a specific tool and chose Onsite instead.

→ Switched from Excel

Reidius Infra

Infrastructure contractor, India

"We were managing everything across spreadsheets and WhatsApp groups. There was no single version of the truth. Onsite gave us that — every site update shows up for the office in real time."

40%

Reduction in billing errors after switching

→ Switched from paper muster rolls

SFC Infratech

Civil contractor, India

"We had ghost worker problems and daily disputes over attendance. After Onsite, every worker checks in with face recognition and payroll runs automatically. Not a single dispute since."

Zero

Payroll disputes since going live on Onsite

→ Switched from disconnected tools

Cyath Contracting

Specialist contractor, UAE

"Operating across Dubai projects, we need one system for site and finance. Onsite has everything — daily progress reports to verify billing. Setup was faster than we expected."

4 days

To go fully live in Dubai

No credit card · No long-term contract · Free onboarding included

Onsite is a construction management software built to help construction companies run projects with clarity and control. As a complete construction ERP software, it connects site teams, project managers, procurement, and finance on one platform. By replacing scattered tools and manual tracking, Onsite construction software helps businesses save time, reduce cost leakages, and improve execution across every project. The result is a practical ERP software that supports real site operations, not just reports.
