INTERIOR PROJECT MANAGEMENT SOFTWARE

# Your Interior Projects, Finally Under Control.

Most interior firms lose money on projects they should have won. Scope grows, vendor bills pile up without matching any purchase order, and the client always seems to hear a different number than what you quoted. **Onsite fixes the gap between what you quoted and what you actually spent.**

#### WHY ONSITE

# How Onsite Helps Interior Companies Run Tighter Projects

Interior work is fast, messy, and client-facing. The margin for error is thin. Here is what changes when you move from spreadsheets and WhatsApp to Onsite.

#### BEFORE

Vendor bills arrive and get paid. Nobody checks whether the work was actually done or matches the purchase order. Disputes happen later when it's too late to recover the money.

#### WITH ONSITE

Every vendor bill is matched to a **purchase order and delivery record** before it can be approved. Multi-level sign-offs mean nothing gets paid without the right person seeing it first.

TRUSTED BY INTERIOR COMPANIES IN INDIA  
& MIDDLE EAST

# 98%

**BEFORE** Scope grows through WhatsApp messages and verbal agreements. By the time you calculate the actual project cost, you're already over budget with no documentation to back a change order.

**WITH ONSITE** Quotations, BOQs, and scope items are tracked digitally from day one. **Every change is logged** with a timestamp. Client approval records stay in the system, not in a chat thread.

**BEFORE** Labour attendance is marked manually by a supervisor. Payroll is calculated at month end from a register that may or may not reflect what actually happened on site.

**WITH ONSITE** **GPS-tagged attendance and face recognition** replace the register entirely. Salary calculations run from verified attendance data — no manual reconciliation, no disputes.

**BEFORE** You find out the project made a loss after handover, when all the bills are in. There is no way to see whether you are heading for trouble mid-project while there is still time to act.

**WITH ONSITE** **Live project P&L** updates as bills come in and work progresses. You see margin erosion the week it happens — not the month after the project closes.

of Onsite clients renew every year. Most say the reason is simple: they can see where their money is going, mid-project.

**<1 day**

MANUAL VS DIGITAL

# WhatsApp and Excel Cannot Run an Interior Project

They work fine for one project. The moment you have three running, six vendors to pay, and a client asking for an update, they stop working.

📱 HOW IT LOOKS RIGHT NOW

Flooring bill ₹2.1L — please approve

ok paid

Marble change — doing Italian instead

sure manage it

⚠️ Month-end: project ₹3.2L over budget

|------------------------------|-------------------|
| Civil & Flooring             | 88% done          |
| Vendor Bills — matched to PO | ₹14.2L approved   |
| FF&E — scope change logged   | Client approved ✓ |
| Live Project Margin          | 18.4% on track    |

WhatsApp + Excel + Registers

How most interior firms run today

VENDOR BILLS

Bills approved on WhatsApp. Nobody checks if the work was done or matches the PO. The loss shows up at the end.

Onsite ERP for Interior Companies

Full visibility, from quote to handover

VENDOR BILLS

Every bill is matched to a **PO and delivery record** before approval. Digital sign-offs. Full audit trail. Nothing gets paid without the right person signing.

**✗ PROJECT COST**

Total cost is visible only after handover when every bill is finally in. Overruns have already happened.

**✗ SCOPE CHANGES**

Client asks for changes verbally. Nothing is written. At billing time, they dispute the extra amount because there is no record.

**✗ LABOUR ATTENDANCE**

Supervisor marks a register. Payroll calculated manually. Workers who were absent still get counted — disputes every month.

**✗ MATERIAL TRACKING**

Materials ordered on call, tracked loosely. Leftover stock discovered after handover — the over-ordering loss is already done.

**✗ CLIENT UPDATES**

WhatsApp photos with no standard format. Different clients get different information. Confidence drops fast.

**✓ PROJECT COST**

**Live P&L updates** as bills come in. See margin erosion the week it happens — with time left to act on it.

**✓ SCOPE CHANGES**

Every change is **logged with a timestamp** and client approval captured in the system. Billing disputes become rare.

**✓ LABOUR ATTENDANCE**

**GPS + face recognition** captures who was actually on site. Payroll runs from verified data — no manual reconciliation, no ghost workers.

**✓ MATERIAL TRACKING**

Requests linked to **project budget**. Deliveries matched to POs. Stock updates in real time — no over-ordering, no end-of-project surprises.

**✓ CLIENT UPDATES**

**Structured PDF reports** generated from live site data. Same format every time — actual progress percentages and costs, not photos.

**Go live in less than a day. No IT team needed.**

Your onboarding manager loads your material library, BOQs, and party master before day one.

## PLATFORM FEATURES

# Everything Interior Firms Need. One Platform.

The three modules below cover where interior projects most commonly lose money: progress, materials, and unverified labour costs.

 **PROGRESS TRACKING**

## Take Control of your Project

Onsite offers real-time updates on task progress, milestones, and activities, helping projects stay on schedule and within budget. Visual documentation gives everyone the same picture of what is happening on site.

- ✓ Instant updates from site without waiting for calls or messages
- ✓ Task and progress tracking tied to actual milestone completion

MATERIAL MANAGEMENT

## Track Inventory & Stock

Onsite interior software helps interior designers manage materials efficiently, accurately, and profitably, solving some of the biggest material-related challenges they face on interior sites.

- ✓ Avoid material wastage by tracking usage against project budget in real time
- ✓ Track material usage and expenses per project, not across a shared sheet
- ✓ Generate purchase orders, match deliveries, and validate bills before payment

Anika Electricals Invoice #88

₹1.4L

Pending

- ✓ Quotations for vendors sent and compared directly from the platform

[See this in a demo →](#)

## LABOUR MANAGEMENT

# GPS Based Workforce Management

Efficiently track your workforce attendance and payroll with Onsite's Labour Management System, built specifically for interior project sites where workers are subcontracted and attendance registers are unreliable.

- ✓ Monitor daily attendance using GPS with location proof on every record
- ✓ Face recognition removes the possibility of proxy attendance entirely
- ✓ Manage labour costs and payments from verified attendance data
